New Gear for Active Dogs

By Berne Broudy

Dog owners who like to adventure with their canine companions will delight at these new offerings for active dogs. With the following gear, your ever-faithful buddy will be dressed for the weather, cared for post-trail (or post-trial) and ready for playtime, anytime.

ALL TERRAIN PAW SAVER

From All Terrain, our neighbors in Sunapee, New Hampshire, comes a new personal care product for dogs. Paw Saver soothes and protects dry, chapped paws. Made from calendula, rosemary and lavender in a base of canola oil, castor oil and beeswax, the ingredients heal, soften and provide antiseptic protection. Cornstarch in the mix means you'll want to rub it in well, or your four-legged friend might leave white footprints on the couch. Humans can expect the added benefit of developing their own soft paws after administering to canine companions. All Terrain has other all-natural products for dogs, including a DEET-free insect repellent and soap designed to subdue intense odors, including skunk. Paw Saver, 2 ounces, \$6.99. www.allterrainco.com.
